

Take Control of Your PBX

Deploy on Windows, Linux or in the Cloud

> 3CX Phone System

3CX offers a complete Unified Communications solution out of the box. As an open standards software PBX, installation and management of your phone system has never been easier.

- Easy self installation & management
- Slash telco & communications costs
- Boost productivity with UC: Presence, Chat
- Work on the go: Android & iOS clients
- Integrated WebRTC Video Conferencing
- Improve Customer Service: Click2Call & CRM integration
- Install on premise or deploy in YOUR Cloud

“3CX is forward thinking, it developed a robust software PBX with hypervisor in mind and its communication solutions are a great fit for organizations of any size.”

Felipe Garcia, Director of Infrastructure & Services - Americas **Wilson**

Try out 3CX today - deploy on-premise on Windows or Linux or in the cloud with Google, Amazon, 1&1, OVH or Openstack for a flexible and cost effective Unified Communications solution. Install in your own cloud account and retain control of your PBX.

› Unified Communications for Every Business

3CX includes a full suite of unified communications features without the need for additional downloads, add ons or purchases. Integrated, WebRTC-based video conferencing via an open-standards browser or through the iOS/Android clients allows for face-to-face meetings to take place wherever you are. Productivity boosting features such as Presence, corporate chat, whiteboard, screensharing and more allow for employees to collaborate better and work more efficiently.

› The Self-Managing PBX

3CX makes management of your office phone system a walk in the park. Ongoing maintenance is reduced to almost nothing with automation of everyday tasks and the ability to monitor critical processes from a single dashboard in the management console. Updates to the PBX as well as certified firmwares are automatically downloaded and can be deployed network-wide in just a few mouse clicks. Plug & Play compatibility with IP phones and SIP trunks ensures simple setup and scalability. Elimination of tedious management tasks frees up administrator's time and the modern, intuitive, user-friendly management console makes configuration pain-free and effortless.

› Safe, Secure, Straightforward

We have integrated the most advanced and up to date security protocols and technologies into 3CX, safeguarding your communications against all types of attacks. The PBX offers easy to enable and manage security features such as IP blacklisting, SRTP encryption, automatic detection of SIP attack tools, provisioning of phones through HTTPS, SSL connectivity and an A+ rating from SSL Labs to boot. All of this is combined with bulletproof web server configuration for your peace of mind.

› One Extension, Endless Possibilities

Softphones for Windows and Mac and smartphone clients for iOS and Android work seamlessly in conjunction with the Web Client for unbeatable connectivity and mobility. Users can make and receive calls, view the presence of colleagues, schedule conferences, take part in web meetings, transfer calls and more all from the palm of their hand. Integration of PUSH technology means never missing a call again whilst saving on battery usage.

› All of Your Apps Working Together

Integration with your other applications is easy; connect 3CX with popular CRMs such as Salesforce, Google Contacts, SugarCRM, Office 365 and more. Employees can save time and increase productivity with call pop-ups, journals and more by working seamlessly across apps. What's more, the 3CX ClicktoCall Chrome extension allows users to dial numbers from any website or CRM system by simply clicking on the highlighted phone number.

› Cut Costs, Boost Profits

Save on your office phone bills and eliminate interoffice call charges by connecting remote branches and allowing remote workers to use their extension wherever they are. Additionally, as a software PBX, 3CX allows you to install the phone system on your existing hardware, eliminating the cost of pricey black box appliances and servers. What's more, travel costs are no longer an issue; employees can hold face to face web conferences at the click of a button rather than attend meetings on location.
